3B7, ST. BRANDON ISLANDS (Not Agalega/DXpedition Update)

Dxpedition leader, Witek, SP9MRO, and his team encountered problems with their catamaran on their way to Agalega Island (3B6) and had to head to St. Brandon Island (3B7) instead. It seems their catamaran "Josephina", had lost one of two engines and a sail which was torn due to high winds and bad seas. However, all are safe and the catamaran was towed by a fishing vessel called "Covadis" to the Island of Raphael (St. Brandon Island). OPDX was told that St. Raphael Island "is like a football play ground with two buildings, one for the Coast guards and the second, a 6 room bungalow for the Meteorological services, but with no water and light, only one generator and two wideband G5RV and lots and lots of birds, this place is more beautiful than Agalega." The team has received permission to operate as 3B7SP while their catamaran is being repaired. Activity will possibly last until June 19th. QSL via SP9SX. For more possible details and updates, visit the 3B6SP Web page at:

http://3b6.godx.eu/

NEVER GIVE UP!

Gabe, KP4BJD, informs OPDX that he was pleasantly surprised this past week when he received a QSL card from **WA6DDR/KM6** (Midway Island) for a QSO he made on the 29th of May in 1963 on 20 meters SSB. Gabe states,

> "The operator Mac soon after retired from the U.S, Navy... his callsign is now

K4RBM. Mac went to the Dayton Hamvention for his first time this year, 'enjoyed it a lot' ..and it seems to sparked his interest all over again .. enough to catch up with old QSL cards he had not answered ... So, there's hope for those who wait, if they have 'enough' patience."

N8S QSL STATUS. Dragan, YZ1EW/RA4U, reported on June 8th that the first batch of 1000 N8S QSL cards were mailed. Other cards will be mailed in the next 30 days.

YW0DX (Wrap-up). OPDX was informed that the log is uploaded to LoTW. Conrad, IT9DAA, states,

> " This DXpedition (to Aves Island - **NA-020**) was a success although there was not much time to operate and we had fewer operators than expected. Hence we had to adjust our operating plan and concentrate on the low bands and RTTY. Unfortunately, the planned schedule of our Naval Army could not be altered, and there- fore our length of stay on the island had to be cut short. Our on-the-air time was subject to numerous interruptions due to main- tenance required to keep the local generators running. Aves Island was on the air from February 8-13th, 2007. Despite the difficulties involved, our final score reached 23,000 QSOs - quite good for just 70 hours of operating. Regrettably, propagation conditions on the high bands were not favorable. Anyway, heavy pileups on 160m and 80m proved an unforgettable experience. Logs, video, photos and QSL design from the DXpedition can be seen at: **http://yw0dx.4m5dx.org/** "

QSLS VIA LOTW: BX5AA, CU3AL, HV0A, IZ0FKE, MJ/K8PT and RX3AGD

SV/A, MOUNT ATHOS (Pirate Alert)

Veronica, IK3ZAW/W6, writes to OPDX:

> "Hi - I am writing on behalf of Fr. Apollo, SV22ASP/A. Last month he has been quite active on SSB, CW, and RTTY (with over 1,500 QSOs in the log). HOWEVER some idiot who did not have anything better to do with his time, transmitted using his callsign on CW while Fr. Apollo was operating on phone! Fr. Apollo thus asked me to clarify that on 5/16/07 11:00pm-2:00am he was operating PHONE. CW CONTACTS AT THIS TIME ARE PIRATE. All other CW contacts should be ok. He has received a lot of cards for contacts that are not in his log (occurred at the time I indicated above), and he is feeling really bad for those who are writ- ing him, wasting their time and money. He is really busy right now, as the Fathers are building three big cisterns for the monastery, so he does not forsee any further activity for awhile. I would really appreciate if you could spread this message through your respective bullettins. Thank you very much in advance.... 73s Veronica IK3ZAW/W6"
